und Photonik

Precision Photonic Systems

W3+ Fair Convention

Program

Session 1 - Precision Optics Generation

Keynotes

- New technologies as key components in optical systems – which key fits into which lock?
- Selective laser-induced etching – a novel tool for photonics manufacturing

Session 2 - Systems and sensors for specific applications

Keynotes

- Photonics metrology in the nanoscale
- Advanced digital technologies in Life Sciences: Photonics and beyond

Session 3 - Miniaturization of photonics and photonic microsystems

Keynotes

- The micro optics revolution in automotive
- Photonic system integration by applying glass based microelectronic packaging approaches

Session 4 - Electronics and image processing in photonics

Keynote

- Sub nanosecond photonics
